PERSONAL SUMMARY

Experienced Data Analyst and Power BI Developer with a proven track record of leveraging data visualization tools to translate complex data into actionable insights. Proficient in gathering data from diverse sources and designing intuitive dashboards for business users. Strong technical knowledge in data warehousing and SQL development with hands-on experience. Expertise in designing, developing, and implementing data and analytical solutions. Motivated team player with excellent communication skills, capable of collaborating across departments to deliver impactful business intelligence solutions.

EXPERIENCE

Senior Power BI Developer – Colaberry Inc. | Plano, TX

September 2019 – Current

- Designed comprehensive data models to convert raw data into meaningful and actionable insights that support business decision-making processes.
- Created visually appealing and interactive dashboards and reports using Power BI to effectively communicate data trends and patterns.
- Identified and consistently monitored key performance indicators (KPIs) to ensure they align with and support the overall business objectives.
- Performed detailed data analysis using complex DAX queries and functions to derive deeper insights and inform strategic decisions.
- Developed, deployed, and thoroughly documented Power BI scripts to streamline and enhance data analysis and reporting processes.
- Conducted extensive data warehouse development and performed advanced SQL querying to ensure optimal data retrieval and storage.

Business Intelligence Developer – Paradise LeGarde Co.

November 2016 – September 2019

- Designed and developed robust data models that support efficient data analysis and facilitate comprehensive business intelligence solutions.
- Created and maintained complex ETL processes to extract, transform, and load data from various sources into BI systems for accurate analysis.
- Developed detailed reports, interactive dashboards, and insightful visualizations using Power BI and SSRS to present data insights clearly.
- Designed, developed, and maintained extensive data warehouses and data marts to organize and manage large volumes of structured and unstructured data.
- Optimized the performance of BI solutions by fine-tuning database queries and enhancing ETL processes to ensure fast and efficient data retrieval.
- Collaborated closely with business analysts, data scientists, and other stakeholders to gather requirements, provide feedback, and deliver tailored BI solutions that meet their needs.
