CAREER OBJECTIVE

A results-driven and dynamic Data Analyst with over 4 years of experience in data analytics and business intelligence. Experienced in leveraging advanced analytics tools and methodologies to gain insight, make informed strategic decisions, and drive business growth. I bring a strong analytical background and a comprehensive understanding of business dynamics to deliver high-impact analysis and actionable recommendations to propel organizational success.

PROFESSIONAL SUMMARY

- Experience building Data Analytics and solutions resulting in increased business efficiency.
- Analyzed reports using Tableau and Power BI, generating visuals such as bar graphs, scatter plots, pie-charts, maps, funnel charts, donuts, bubbles, and other visualizations, etc.
- Skilled at writing SQL queries to analyze and validate data in depth. This includes advanced SQL commands, views, sub queries, and joins.
- Created summary and detailed reports using Power BI Drill Down and Drill Through techniques to better understand visualization techniques.
- Proficient in Python (using Numpy, Pandas, Matplotlib libraries) for Exploratory Data Analysis (EDA), effectively summarizing and visualizing key characteristics of diverse data sets.
- Ensured data accuracy and consistency through strong knowledge of data quality assurance and data governance.
- Participated in daily meetings to discuss tasks, and weekly meetings to present tasks and reports.
- Strong problem-solving skills and an attention to detail, with a constant focus on improving the data processes.
- Effective communicator who can convey complex data insights to nontechnical audiences.

TECHNICAL SKILLS

Data Analytics: Data cleaning, Manipulation, Visualization, and Normalization

Language: SQL & Python

Reporting Tools: Power Bi & Tableau

Databases: MySQL & SQL Server

Python Libraries: Pandas, Matplotlib, NumPy, Scikit-learn

PROFESSIONAL EXPERIENCE

Dick's Sporting Goods | Data Analyst | September 2022 - present

- Converted data into actionable insights by predicting and modeling future outcomes.
- Produced reports and provided analysis using Power BI charts and graphs, including supporting management teams with report generation and analysis.

- Transformed numbers and facts to inform strategic business decisions with management from various departments.
- Utilized Power BI to create sub-reports, drilldown reports, summary reports, and parameterized reports based on sales & financial data.
- Contributed to the finance department's decision-making by creating financial reports highlighting sales trends and growth, expenses, and profitability.
- Used Power BI features to create and configure hierarchical dimensions, including measures, calculated columns, KPIs, filters, and aggregations.
- Utilized several DAX functions for efficient data visualizations in Power BI using various fact calculation calculations.
- Utilized statistical tools to interpret data sets, paying special attention to trends and patterns that could be valuable in diagnostic and predictive analytics.
- Communicated effectively with project manager regarding any issues or roadblocks.
- Using shortcuts and formula functions to calculate data quickly and efficiently.

Landstar Sysems | Junior Data Analyst | April 2021 - August 2022

- Translated business requirements and needs into analytical solutions in multiple IT areas and with a variety of stakeholders, including key leaders and managers.
- Constructed analytical data models describing all data and relationships between it, created BI reports, dashboards, and KPIs using charts, graphs, and maps.
- Used Excel and MS Access to retrieve data and analyze based on business needs.
- Supported the data warehouse in identifying and revising reporting requirements. Wrote complex SQL queries, built database tables, views, procedures and tune SQL query to optimize Power BI dashboard performance.
- Created financial reports to assist the finance department in making informed decisions.
- Created and maintained detailed survey dissemination procedures to meet guidelines for various grant deliverables.
- Setup dashboards on the server, including schedules for refreshing and access to users and subscriptions.
- Processed confidential data and information according to guidelines.
- Identified areas for improvement and enhanced overall customer satisfaction by conducting a thorough analysis of customer satisfaction data.

Crown Equipment | Data Analyst Intern | May 2020 – March 2021

- Created and maintained rich interactive visualizations through data interpretation and analysis.
- Expertise in creating filters, quick filters, data source filters, global filters, context filters, user filters, actions, and dashboards.
- Integrating various reporting components from multiple data sources.
- Analyzed successful project patterns and funding trends using Power BI.
- Assembled side-by-side bars, scatter plots, stacked bars, heat maps, filled maps, and symbol maps in accordance with deliverable specifications.
- Generated joins and subqueries for intricate queries involving multiple tables and fields.
- Effectively used data blending feature in Tableau to connect different databases like Oracle and SQL Server

EDUCATION

Virginia Commonwealth University (VCU)

Bachelor of Science in Business Administration and Marketing
Integrated Marketing Communications Concentration

Syntax Technologies

Data Analytics and Business Intelligence
