Highly skilled and results-oriented Senior Software Engineer with 8 years of extensive experience in the Healthcare, Legal advisory, Banking, Financial Services, and Insurance (BFSI) sector. Proficient in developing innovative software solutions to address complex challenges in the industry. Seeking opportunities to leverage expertise in software development, team leadership, and project management to drive business growth and success.

SKILLS

PHP, LARAVEL, CodeIgniter, AngularJS, Angular8-17 framework, MySQL, PostgreSQL

PROFESSIONAL EXPERIENCE

Sr. Software Engineer | FCS Software Solutions - Noida, India   05/2024 – TILL DATE*
- Led a team of 6 software engineers in the design and development of innovative healthcare software solutions.
- Developed robust backend systems to support healthcare facility operations and ensure seamless functionality.
- Engineered front-end components using the Angular framework, optimizing UI performance for enhanced user experience.

Sr. Software Engineer | Indus Net Technologies Ltd - Noida, India
08/2022 – 17/05/2024
- Led a team of 8 software engineers in the development of cutting-edge financial software solutions.
- Designed and implemented scalable and robust systems, with frontend and backend technologies.
- Collaborated with cross-functional teams to deliver 10 high-quality software products within budget and timeline constraints.
- Utilized agile methodologies to manage project workflows, resulting in a 30% reduction in time-to-market for new features.
- Contributed to architectural design decisions, and featured the application.

Senior Web Developer | Chawtech Solutions Pvt. Ltd. - Noida, India
01/2019 – 08/2022

- Developed and maintained software applications for financial risk management, compliance, and regulatory reporting.
- Led efforts to implement data integration solutions, reducing data transfer times by 40% and enhancing overall system efficiency.
- Collaborated closely with business stakeholders to analyze requirements, propose technical solutions, and ensure alignment with strategic objectives.
- Proactively resolved 100+ software defects and performance issues, minimizing disruptions to business operations and ensuring optimal system functionality.
- Facilitated 20+ peer code reviews and knowledge sharing sessions, fostering a culture of collaboration, learning, and continuous improvement within the team.
-

Web developer| Weather Risk Management Services - Kanpur, India   04/2018 – 08/2022
- Enabled real-time tracking and localization of objects, facilitating efficient logistics management.
- Increased transportation efficiency by 20% through streamlined operations and route optimization techniques.

- Reduced delays by 40% by providing actionable insights for choosing the most efficient routes.
- Achieved a 30% reduction in accidents and losses through route-wise advisories.
- Enhanced accountability by 50% through insights into driver behavior and adherence to safety protocols.

Assistant project manager| Indian Institute of Technology (IIT Kanpur) - Kanpur, India
05/2013 – 12/2017
- Designed middleware to interface with RFID hardware, ensuring smooth communication and integration.
- Programmed device drivers for RFID hardware and modules to guarantee seamless operation.
- Developed a data exchanging gateway to interface hardware and wireless modules through a Windows application.
- Created and executed comprehensive functional test cases, covering all aspects of the RFID environment.
- Analyzed patterns and behavior of RFID systems to optimize performance.

EDUCATION
MCA | Rajasthan Technical University, Kota | Rajasthan, India
2012
B.Sc | Dr. Ram Manohar Lohia Avadh University, Faizabad
2009
